DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-17 and 55, drawn to a method for the determination of lipid individual molecular species.

Group II, claim(s) 18, drawn to a diagnostic kit.

Group III, claim(s) 19-20, 56 drawn to a method for assessing a risk.

Group IV, claim(s) 21-22, drawn to a method for identifying an agent.

Group V, claim(s) 23-25, drawn to a method of identifying a candidate lipid modulating drug.

Group VI, claim(s) 26-27, drawn to a method for diagnosing.

Group VII, claim(s) 28-29, drawn to a method of screening candidate chemicals.

Group VIII, claim(s) 30-39, drawn to a method of treating a subject.

Group IX, claim(s) 40-41, drawn to a method of managing a library of chemicals.

Group X, claim(s) 44-48, drawn to a method of providing a medical care.

Group XI, claim(s) 49-54, drawn to various aspects.

Examiner's Note: Claims 49-54 are written in improper format and cannot be considered or examined the way they written. The claims do not meet requirements of 35 U.S.C.112, Second paragraph, since it is not apparent, what the claims recite.

The inventions listed as Groups I-XI do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the only common technical feature for most of these groups is LC/MS analysis of lipids, which is well known in the art see e.g. Erdahl et al.

"Analysis of Lipids by High Performance Liquid Chromatography-Chemical Ionization Mass spectrometry" (JAOCS, 1985), and therefore do not share any common special technical feature.

2. A telephone call was made to Robert Reeser on 02/17/09 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 1797

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
